DISCOVERY

THE MAGAZINE OF SCIENTIFIC PROGRESS

FOR THE YEAR 1961 VOLUME XXII

Editor: GERALD LEACH
Mercury House,
103-119 Waterloo Road,
London, S.E.1,
England.

ARTICLES

Archaeological Treasures of Mexico's Gulf Zone, *I. Nicholson*, 71
Architecture of Viruses, The, *R. W. Horne, P. Wildy*, 424
Astronomy in the Soviet Union, *P. Moore*, 69
Automation of Medical Analysis, *I. Wootton*, 438

Biological Clocks, *J. E. Harker*, 138
Biorheology, *G. W. Scott Blair*, 532
Bridge from Arts to Science, A, *A. D. Peterson*, 374

Character of the Universe, The, *W. Davidson*, 205
Communications Satellites, *J. R. Pierce*, 306
Cooling Animal Life, *A. U. Smith*, 454

Detecting Faint Galactic Clouds, *G. Courtes*, 156
Development of Problem-solving Ability, The, *I. M. L. Hunter*, 344
Discoveries about Viruses, *M. Stoker*, 14

Earless Monitor Lizard, The, *T. Harrison*, 290
Early Development of the Parent-Child Relationship, The, *R. A. Hinde*, 48
Econometric Model of Growth, An, *R. Stone*, 216
Electrical Synthesis of Music, The, *A. Douglas*, 56
Elementary Particles, The, *O. R. Frisch*, 518
Employment Outlook for Scientists and Engineers, The, *J. F. Peter*, 74
Environmental Control of Reproduction, *R. L. Holmes*, 500
Evolution of "Humans" on other Planets, The, *W. Howells*, 237
Exploiting Britain's Water Resources, *S. Gregory*, 384

Far Side of the Moon, The, 242
Forces that Shape the Embryo, The, *L. Wolpert, T. Gustafson*, 470
Formation of Galaxies, The, *D. W. Sciama*, 406
From Laboratory Bench to Factory Floor, *R. Calder*, 122
From Nerve to Muscle, *R. Miledi*, 442
Future Uses of Plastics, *H. A. Collinson*, 380

Generation of Electricity in Thunderclouds, *B. J. Mason*, 147

How Much, How Many, What Sort?, *R. Calder*, 30
Human Arousal and Efficiency in Performing Vigilance Tasks, *D. E. Broadbent*, 314

In Defence of Freud, *J. A. C. Brown*, 495
Influence of Genetics on Human Language, The, *L. F. Brosnahan*, 400
International Indian Ocean Expedition 1959-64, The, *R. G. Snider*, 114

Last Alchemist, The, *J. H. S. Green*, 19
Learning and Memory in Old Age, *J. Graham White*, 451

Magnetic Fields in Galaxies, *R. D. Davies*, 99
Magnetohydrodynamic Power Generation, *D. T. Swift-Hook*, 326
Mass Fires Following Nuclear Attack, *A. Broido*, 110
Measuring Human Stress, *H. S. Wolff*, 484
Measuring the Ozone above the Earth, *R. Frith*, 390
Modern Low Noise Amplifiers, Part II: Masers, *I. M. Stephenson, G. D. Sims*, 22
Motor Vehicles, Air Pollution, and Afterburners, *W. L. Faith*, 258

Neutrons and Protons, *E. H. S. Burhop*, 184
New Approach to Ancient Disease, A, *C. Wells*, 526
New Inventions from an Old Discovery, *J. H. M. Sykes*, 120
New Light on Stammering, *H. V. Hemery*, 404
New Look at Some Surfaces with Multiple-Beam Interferometry, A, *S. Tolansky*, Part I, 4; Part II, 65
New Progress with Boundary Layer Control, *R. Allen*, 311
New Research Tools for the Archaeologist, *M. J. Aitken*, 246
New Ways of Curing Neuroses, *H. J. Eysenck*, 151

Observing Living Specimens with the Electron Microscope, *G. Dupouy, F. Perrier, L. Durrieu*, 161

Power for Industry, *R. Calder*, 76
Producing Chemicals with Nuclear Fission Energy, *G. R. Hall*, 284
Producing Transplantable Human Tissue in the Laboratory, *D. Petrucci*, 278
Progress in Mapping the Moon, *Z. Kopal*, 334
Progress in Microminiaturisation and Molecular Electronics, *S. J. Angello*, 392
Prospects and Consequences of a Major Stellar Explosion, The, *C. M. Cade*, 356
Prospects for Computer Control in Industry, The, *F. R. Himsworth*, 294
Prospects for Controlling and Forecasting the Weather, *R. C. Sutcliffe*, 350

Regrouping of Separated Cells, The, *A. S. G. Curtis*, 199
Remaining Barriers to Automation, *L. C. Payne*, 478
Rising Threat from Animal Diseases, The, *K. V. L. Kesteven*, 107

Search for New Elements, The, *A. Ghiorso*, 488
Seeing by Heatwaves, *C. M. Cade*, 432
Shaping Metals Electronically, *D. Fishlock*, 255
Significance of Tunnelling into Superconductors, The, *I. Giaever*, 338
Soil as a Habitat for Life, The, *Sir E. John Russell*, 547
Straining Water Out of the Clouds at Gibraltar, *G. W. Hurst*, 118

Table of Artificial Earth Satellites, 220
Teaching Machines, *M. Sime, H. Kaye, J. Annett*, 191
Tongue and Brain, *G. H. Wright*, 94
Towards Controlled Fusion, *J. D. Jukes*, 540

Uranium, Plutonium, and Nuclear Breeders, *J. L. Gillams*, 212
Unsolved Problems of Weather and Climate, *R. C. Sutcliffe*, 300

Visual Observations of the Planets with Colour Filters, *V. A. Firsoff*, 231

PROGRESS OF SCIENCE

Advent Communications Satellite, 422
Algae in Meteorites?, 514

Behaviour of Animals, Men, and Machines, 183
Brain Cooling, 515
Breaking Rock by Electricity, 515

Can Venus be made Habitable?, 181
Cells Divide Faster in Space, 91
Communication or Frustration in Space?, 450
Controlling Vector Diseases, 514
Crab's Clock, The, 2
Critical State of Critical Tables, 133

Deep-Sea Diving without "Bends," 133
Design of Major Gagarin's Satellite, The, 228
Detergents, Skidding, and Radio Isotopes, 92
Discovery in Antarctic Puzzles Scientists, 46
Dispersal of Radioactive Tritium from Bomb Tests, 228
Do Meteors Cause Rain?, 276
Drift of Earth's Poles, 228

Electricity from the Decomposition of Organic Matter, 228
Element 103 Created and Identified, 229
Erwin Schrödinger, 47
Europe in Space, 516
Existence of Solar Winds Confirmed, 229

Fall-out, 514
First Dendroglyphs, 372
Fish, Penguins, and Biological Clocks at the Antarctic, 181
500,000 Gallons of Salt-free Water per Day for Guernsey, 41
French Scholarships, 134
Frontier Work in Atomic Energy, 324

Gravel on an Ocean Bottom, 274

Harnessing Underground Heat, 322
Hyrcanian Tiger, The, 372

IAEA Meeting on Biological Effects of Atomic Radiation, 181
Improved Cancer Diagnosis Claimed for New x-ray Technique, 41
International Symposium on the Moon, 87

Lag in the Machine-Tool Industry, The, 43
Largest Nature Reserve, 322
London's New Communication Tower, 93
Long-Range Radio Transmission through "Ducts," 91
Low-Level Radiation Affects Seizures in Mice, 3

Mach 50 Shock Tunnel, 136
Machines to Control Scientific Babel, 418
Malaria Eradication Programmes around the World, 1
Mars Covered with Ice?, 136
Met. Office Takes Up Rocketry, 364
Mortality Drops and Shifts in Europe, 43

New Atmospheric Research Centre in U.S., 41
New East German Telescope, 91
New Energy for Under-developed Nations, 420
New Life for the Life Sciences, 467
New Light on Fundamental Structure of Matter, 91
New Locust Attacks Expected in Asia and Africa, 92
New Means of Harnessing Natural Resources, 2
New Series of Monographs on Radiochemistry, 42
New Uses for Sugar, 133
New Techniques for Studying Blood Vessel Systems ar Restoring Heart Action, 46
Noise, 322
Northern Rhodesian Perfume, 372
Novel Automatic Dam, A, 92
Nuclear Power on the Moon, 422
Nuclear Tests and the Arms Race, 466

Plant Index by Computer, 364
Power Transmission at 400,000 volts, 87
Profit from Satellite Communication, 516

Quantum Jump in Telephone Versatility, A, 46

Raising Viking Wrecks, 275
Re-Calculating π, 276
Reshuffle in Soviet Science Leadership, 274
RNA and Muscular Contraction, 86
Roman and pre-Roman Excavations, 467

Science and the Crisis, 370
Scientific Co-operation and Disarmament, 469
Scientific Summit, 399
Soviet Tidal Power, 515
Steady-State Theory of Universe Questioned, 91
Stretching the Sound Range, 371
Supersonics at Farnborough, 423
Surface Reactions, 515

Too Many Scientists?, 514

U.S.A.'s Meteorological Satellite Programme, The, 136

Warning from the B.A., A, 418
Warning of Radioactivity, 372
Well-fed Irish, The, 42
Whither the Transport System?, 43
Why Should Machines Play Games?, 370
World Films at Rabat, 466
